In Times Higher Education Impact Rankings 2021
Kharkiv National University of Radio Electronics ranked in group 1001+

21.04.2021

Share Поделиться 0

In the third issue of the influence ranking from the British company Times Higher Education, Kharkiv National University of Radio Electronics took a place in the group 1001+.
Impact Rankings assesses the contribution of the world's universities to the UN Sustainable Development Goals for 2030. In addition to the general place in the world ranking, places are determined for each of the SDGs. More and more universities are recognizing the importance of prioritizing sustainable development in their activities, which is reflected in the expansion of the ranking. The 2021 ranking is the largest to date and includes 1,240 universities from 98 countries.
This year, 15 Ukrainian universities were included in the overall ranking.
Of the 7 SDGs in which the University of Radio Electronics has achieved achievements, the best recognized are SDG 3 "Strong Health" (position in the group 601-800), SDG 5 "Gender Equality" (position in the group 601+), SDG 10 "Reducing inequality" (position in group 301-400). According to the mandatory for participation in the ranking of SDG 17 "Partnership for Sustainable Development", NURE took a place in the group 601-800.
Links to the official website, department websites and other relevant sources are provided as evidence and confirmation of the universities' efforts to achieve the SDG. Bibliographic information is provided by the Elsevier ranking partner. To do this, Scopus has created specific queries that narrow the metric area to articles related to each SDG. As in the world ranking of Times Higher Education, the five-year window between 2015 and 2019 is used.

Metrics

Research on health and well-being (27%)

The data are provided by Elsevier's Scopus, based on a query of keywords associated with SDG 3

Proportion of health graduates (34.6%)

The degree does not necessarily give them the ability to practice directly

Collaborations and health services (38.4%)

Smoke-free policy

Collaborations with health institutions to improve health and well-being outcomes

Outreach programmes in the local community to improve health and well-being

Access to sexual and reproductive healthcare services for students

Free mental health support for students and staff

Community access to university sports facilities

Good health & well-being

2015-2019 Output, Impact, Collaboration

Research supporting SDG3 has grown since 2015, with a compound annual growth rate of 0.9% compared to nearly 3.5% for research in all fields.

The US produces the most research supporting SDG3, followed by China, the United Kingdom, Germany and Italy. Eight of the 10 most prolific locations are high income locations (accounting for more than 2.2 million publications); one is an upper-middle income locations (China) and one is a lower-middle income location (India). No low income locations featured in the top 50.

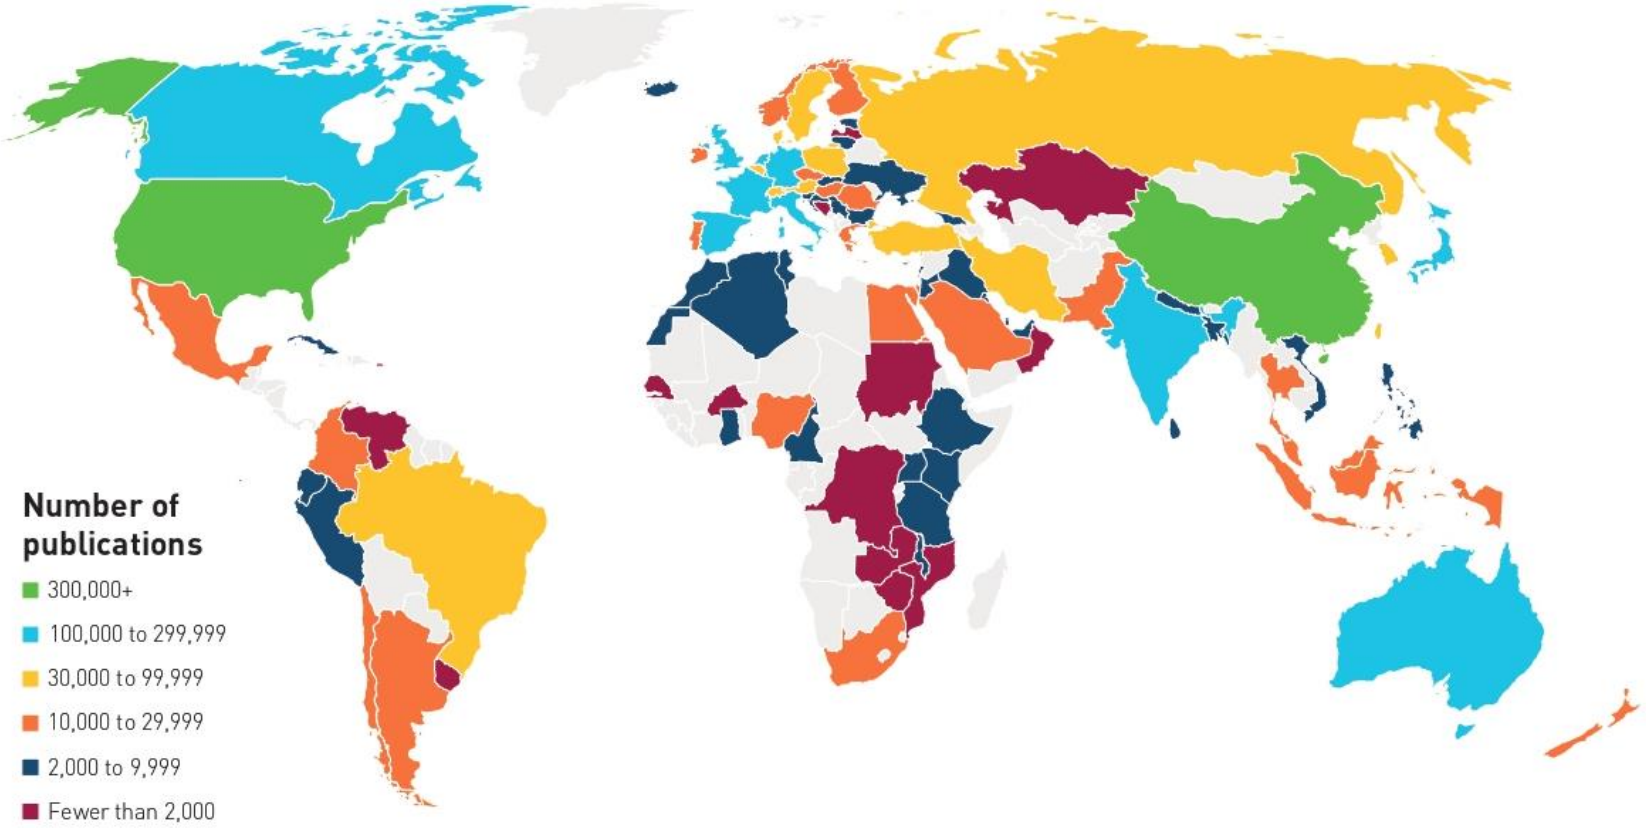
What is FWCI?

Field-weighted citation impact is an indicator of scholarly impact based on the number of times the publication was cited in other research. An FWCI of above 1.0 indicates the impact is above the normalised average



Number of publications
300,000+
100,000 to 299,999
30,000 to 99,999
10,000 to 29,999
2,000 to 9,999
Fewer than 2,000
