

### 2015-2019 **Output, Impact, Collaboration**

#### Research supporting SDG5 has grown since 2015, with a compound annual growth rate of 7.4% compared to nearly 3.5% for research in all fields.

The US produces the most research supporting SDG5, followed by the United Kingdom, Australia, Canada and Spain. Seven of the 10 most prolific locations than 25,000 publications); two are upper-middle income locations (South Africa and Brazil) and one is a lower-middle income location (India). Three low income locations featured in the top 50: Ethiopia (188 publications), Uganda (185 publications) and Tanzania (133 publications).

The top five locations for which research on SDG5 represents the largest share of their research portfolio are Uganda, Kenya, Tanzania, Nepal and Ghana.

International collaboration yielded 17% of research on SDG5. High income locations collaborated with low income locations on 7% of their total SDG5 research, while nearly 72% of the related collaboration with high income locations.

As a measure of academic impact measured by citation, the field weighted citation impact (FWCI) for SDG5 research was above average every year,

### **SDG Resource Centre**

This analysis builds on Elsevier's Sustainability Science in a Global Landscape report, which was released in 2015 to coincide with the launch of the SDGs. Field-Weighted Citation Impact

#### What is FWCI?

Field-weighted citation impact is an indicator of scholarly impact based on the number of times the publication was cited in other research. An FWCI of above 1.0 indicates the impact is above the normalised average
