

Cooperation of education between Kharkov University and Stockholm university

This agreement is between Kateryna Solovyova from Kharkov National University of Radio Electronics and Harald Kjellin from Stockholm University. It concerns cooperation with teaching two university courses. One is called ICT for Cooperative Communication and the other is called Knowledge Technologies.

Agreements concerning the course ICT for Cooperative Communication (7,5 credits)

Students from Kharkov University may register at Stockholm University without paying tuition for studying this course. Stockholm University will provide credits that are valid for universities within the European Union.

As the teaching of this course is done on distance from Stockholm, Kateryna Solovyova from Kharkov University will support the students locally at Kharkov when this is needed.

Agreements concerning the course Knowledge Technologies (7,5 credits)

At Stockholm University this course is called "Knowledge Management" while it is called "Knowledge Technologies" in Kharkov. The principle behind the agreement is that students at the two courses will attend the courses locally respectively in Stockholm and Kharkov, but student groups will be done together, i.e. every student group will solve a task that contains students from both universities.

Students from Stockholm may use online material from Kharkov University and students from Kharkov may use online material from Stockholm University.

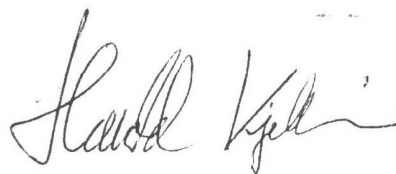

Further cooperation concerning education and research

There are also plans of cooperation concerning research and knowledge management projects. This cooperation is to be formalized later on.

Stockholm 9th of December, 2009

Kateryna Solovyova
Professor at Kharkov National
University of Radio Electronics

Harald Kjellin
Professor at Stockholm University

Agreement

Scientific cooperation between Kharkov National University of Radio Electronics and Stockholm University

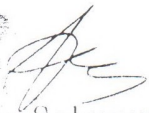

This agreement is between Kateryna Solovyova from Kharkov National University of Radio Electronics (KhNURE) and Harald Kjellin from Stockholm University (SU) based on the successful educational and scientific cooperation development according to the agreement from 9th of December, 2010. It concerns scientific cooperation including common scientific projects, publications, seminars, conferences, etc.

Further cooperation concerning research and education

It is planned to develop scientific cooperation on the basis of the acquired experience including the research of MA students of Social Informatics Department during the training on the common course "Knowledge Management (SU) – Knowledge Technologies (KhNURE)".

Common research in the sphere of knowledge management and systematization, ICT and others, inclusive of common scientific projects, including the projects within the 7th and the 8th Framework Programmes of the European Union, is also planned

Stockholm 15 of December, 2010
